JOFRA calibration

ASC-400

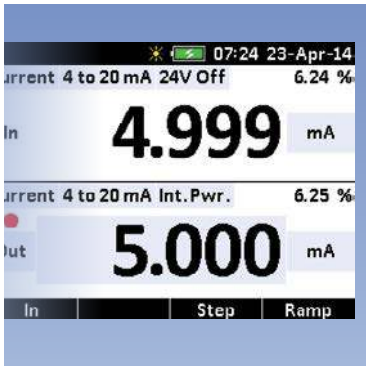
Advanced Signal Calibrator

User-friendly and **innovative**

Advanced Simplicity

The ASC-400 is a portable process signal calibrator that provides the functionality and accuracy you expect from a laboratory calibration system but still compact enough to fit into a toolbox and operate with one hand for easy field calibration. The ASC-400 is more than just a signal calibrator. Combined with our APM external pressure modules or our dry-block calibrator, it will calibrate pressure and temperature.

With its function and cursor keys, the full numerical keypad provides a simple and quick user interface; and the full-color display offers superior visibility and overview. Sturdy construction, state-of-the-art circuitry, and fuseless protection ensure the ASC-400 will deliver consistent high accuracy.



Optimal Read-Out Visibility and High Accuracy

Features a large full color display with the advanced simplicity user friendly interface. The high accuracy ASC-400 meets the demands of modern sensors and transmitters.

Input and Output

RTD: 16 different types; TC: 13 different types; Current 0-24 mA DC; Voltage 0-20 VDC; Frequency 0.05 to 10,000 Hz; Pulse train output; Resistance 5 to 4000 Ohm.

Simultaneous Read-back and Fast RTD Simulation

Including isolated read-back from device-under-test of mA, V, and pressure. The RTD simulation feature is fast enough to work with pulsed transmitters and PLCs.

Calibrate Pressure & Temperature

Full-featured pressure calibrator. Just add an APM, and benefit from automatic leak test, pressure switch calibration, and more. Use the ASC-400 together with JOFRA temperature calibrators, and add measurement channels for temperature sensors or switches.

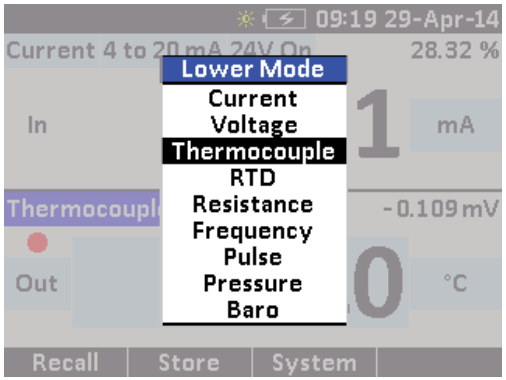
Measure Temperature

Use as a high accuracy thermometer. The ASC-400 works with RTDs and CvD equations to obtain true temperature, based on "true ohm" technology.

Features

Unique “non-menu” User Interface

Easy to use, single layer user interface. No deep menu structure! Operate and set-up the ASC-400 to perform your tasks. Fast and intuitive!



Simultaneous Input and Output

The ASC-400 offers simultaneous input and output, making it possible to calibrate and adjust a transmitter with no additional equipment needed.

Temperature Reading at Reference Level

The ASC-400 offers the ability to characterize an RTD sensor. Use this feature to add a missing special curve or to characterize a reference RTD. This feature, combined with “true ohm” technology, eliminating thermo voltage in the RTD loop, makes the ASC-400 a true reference thermometer.

If you choose a reference RTD from the accurate and stable JOFRA STS temperature sensors, they are delivered with a traceable calibration certificate with the necessary Callendar-Van Dusen coefficients. Enter the figures into the unit, and you have a temperature reference. Complement this with a dry-block temperature calibrator, and your ASC-400 becomes the heart of your portable calibration lab.

Read-back Display

The upper half of the full color display is dedicated to the read-back signal from the device-under-test. This input section is electrically isolated from the circuitry. You can also read pressure from the pressure modules in this display section.

Terminal Block

All input and output connectors are placed away from the display and keyboard to give maximum freedom to operate.

We call it the Wireless Keyboard.

Function Keys

The function of the keys is clearly explained in the bottom of the display.

Primary Display

This part is used for all input or output combinations. The primary display plus the read-back display gives full comprehensive and simultaneous input-output functionality, and an excellent overview of the test in progress.

Numeric Keyboard

A full numeric keyboard gives you the absolute fastest way to reach your desired set point values.

Cursor Keys

Set-up, navigation, fine tuning of output values, for a convenient “analog” feeling.

Features

Connection Assistant

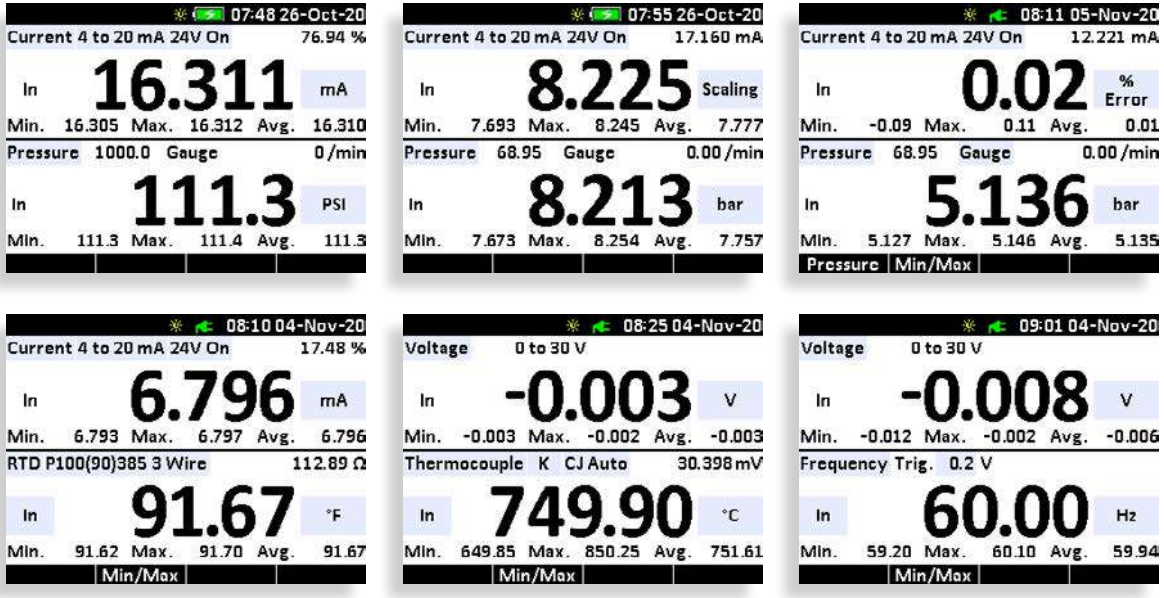
In the latest advancement of the advanced simplicity user interface, the ASC-400 offers a unique Connection Assistant. Multifunction Process calibrators are quite complicated, but the ASC-400s built-in help function provides a graphical depiction of the proper set-up. The connection assistant helps reduce errors and training time. Even the most novice user can quickly become a calibration expert.

The ASC-400 Connection Assistant.

Minimum, Maximum, and Average Calculations

The ASC-400 features automatic calculation functions that display the minimum, maximum, and average readings. These calculations are shown on the same display window as the primary reading, making it easy to see all information without switching screens. When using two measurement channels, both will include the calculated functions for that channel. In this situation, the display will indicate eight different values.

If a new minimum, maximum, or average reading is needed, pressing the zero button will reset each value.



Examples of minimum, maximum, and average readings in the ASC-400 window.

AMETEK®
SENSORS, TEST & CALIBRATION

Features

Fuseless protection

If the ASC-400 is mistakenly connected to over voltage, the unit has a fuseless protection feature, preventing expensive repairs and recalibration.

To avoid injury never connect the unit to the mains supply!

5 “Intellegent” Memories

All settings on both the upper & lower channels are stored and saved with customer-defined memory names.

Useful Soft Case (option C)

An optional carrying case is available for the ASC-400. The spacious soft case provides protection during transport and features separate compartments for the unit, test leads, test hoses, temperature probe, and APM pressure modules. A shoulder strap ensures convenient and safe transportation when climbing ladders, etc.

Power Supply/Charger (option A or B)

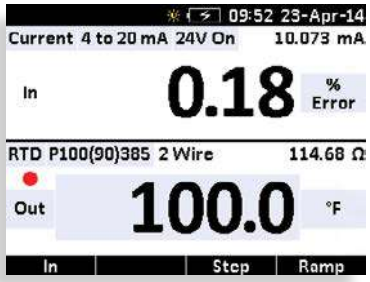
As standard, the ASC-400 ships with 6 AA alkaline batteries. Additionally, two power supply options are available:

Option A

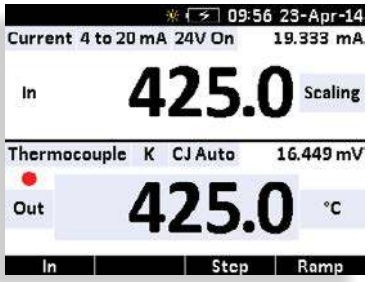
Mains adapter — Used to eliminate battery power and preserve batteries in long term workshop testing and calibration.

Option B

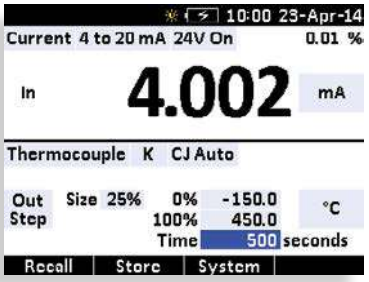
Same as Option A, but supplemented with 6 x AA Ni-MH rechargeable batteries, which charge while mounted in the ASC-400.



Online % calculation, fast and responsive reading, for calibration and adjustment tasks.



User configurable scaling, compare values in the same format, easier than ever.



Set up span, step size, and timing. Set up and ramp times up to 999 seconds.

AMETEK®
SENSORS, TEST & CALIBRATION

Features

Gauge or Absolute Pressure
(BARO option)

The BARO option turns any gauge measuring APM into an absolute measuring device.

Accuracy: ± 0.5 mbarA/0.00725 psiA
Range: 700 to 1100 mbarA/10.153 to 15.954 psiA

Includes all effects of linearity, hysteresis, temperature (-10 to 50°C/14 to 122°F) and stability for one year.

Please note the BARO option is factory installed.

APM Pressure Modules (accessory)

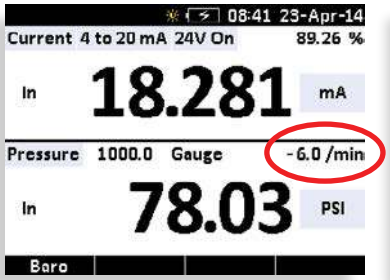
When used with APM CPF Series pressure modules, the ASC-400 becomes a true pressure calibrator with features such as; leak test, switch test, scaling, and online % error calculations.

Pressure ranges from vacuum to 1000 bar / 15 000 psi, accuracies down to 0.025% RDG, fully temperature compensated, and stability for one year.

The modules are engineered for in-plant, field, or laboratory use. They are ready-to-use with immediate recognition and use of the module once plugged into the calibrator. All units are welded, with a permanent filled diaphragm seal. Metal to metal cone seal, and O-ring. CPF adapters to various threading available.

Up to 14 built-in engineering units.

Online % calculation, fast and responsive reading, for calibration and adjustment tasks.



Automatic leak test, adjustable timer, and automatic calculation to leak rate/minute.

Automatic pressure switch test records automatically open, close and deadband values.

Specifications

JOFRA calibration

Temperature Sensor (option T)

- Temperature sensor, -40 to 155°C/-40 to 311°F.
- Delivered with international traceable calibration certificate and CvD coefficients, ready to enter into any ASC.
- Sensor dimensions Ø 4 x 200 mm + handle.
- Calibration points, -40,-20,0,50,100,155°C/-40,-4,32,122,212,311°F.
- Calibration accuracy ± 0.030°C/0.054°F.

Ambient Temperature

Operating temperature	**-10 to 50°C /14 to 122°F**
Storage temperature	**-20 to 60°C /-4 to 140°F**
Humidity	**0 to 80% R.H. non-condensing**
Case protection	**IP40**
All specs specied at ambient temperature	**23°C ± 5°C / 73°F ± 9°F**
Outside ambient 23°C ± 5°C	**± 0.003% rdg/°C**
Outside ambient 73°F ± 9°F	**± 0.0017% rdg/°F**

Power Specifications

Batteries	**6 x AA batteries**
1.5V AA	**Alkaline (non rechargeable) or AA NiMh (rechargeable)**
Mains adapter	**(option) 9VDC/500mA - 230VAC/115VAC**
Low battery warning	**Yes**
Battery lifetime–Backlight low no, loop power	**30 hours**
Battery lifetime–Backlight high, 12 mA loop	**13 hours**
Charging current (optional charger)	**85 mA**
Use only NiMH cells with capacity larger than	**1700 mAh**

Display

Display size	**2,8"**
Resolution	**320 x 240 pixels**
Type	**TFT / Color**
Update rate	**2.5 readings/sec.**

RS232 Communication Interface

Connector	**Mini USB female (B)**
Communication rate	**USB 2.0 / ASCII**

Switch Test Output

Maximum current	**1 mA**
Maximum voltage	**24 VDC**

Physical Specifications (LxHxW)

Unit	**220x55x96 mm / 8.66x2.17x3.78 in**
Weight incl. batteries	**584 g / 20.6 oz**
Unit in soft case	**235x95x115 mm / 9.25x3.74x4.53 in**
Weight incl. test leads & test chips	**933 g / 32.91oz**
Shipping size	**275x100x175 mm / 10.83x3.94x6.89 in**
Shipping weight	**1233 g / 43.49 oz**

10 barA to 31 barA	0.025% RDG	1.0 MPaA to 3.1 MPaA	0.025% RDG	104.5 to 314.5 psiA	0.025% RDG

Specied temperature range -10 to 50°C / 14 to 122°F (APM CPF & BARO option) Vacuum FS, 1 bar / 100 kPA / 14.5 psi. F.S. (full scale) is the numerical value of the positive pressure range. Accuracy includes hysteresis, nonlinearity, repeatability and reference standard uncertainty, 1 Year typical longterm stability, operated inside the rated temperature span and pressure range. Requiring frequently zeroing.

Options & Accessories

Standard Delivery

- ASC-400 unit.
- Battery set (6 x AA).
- Electronic Manual (USB).
- 2 sets of test leads & test clips (black & red).
- Handy soft case, with pocket for the test leads and an opening in the top to provide easy access to the test terminals.
- Full international traceable calibration certicate.

Accessories

Extension Cable for Type K - 5 m **121983**
Extension Cable for Type N - 5 m **122523**
Thermocouple Male Plug — Type Cu-Cu — White. **120519**
Thermocouple Male Plug — Type R / S — Green **120518**
Thermocouple Male Plug — Type K — Yellow **120517**
Thermocouple Male Plug — Type J — Black **120516**
Thermocouple Male Plug — Type T — Blue **120515**
Thermocouple Male Plug — Type N — Orange. **120514**
Thermocouple plug + K wire + alligator **2206011**
Thermocouple plug + T wire + alligator **2206012**
External Power Supply / Charger 9VDC/200mA - 230VAC/115VAC ... **124720**
6x 1.5V AA Ni-MH rechargeable batteries **128859**
Cable 2 m (6.6 ft.) with LEMO/Banana connectors **65-PT100-LB-CABLE**

Ordering

Order No.				Description
ASC-400				Multi-function Signal Calibrator
	BARO			Barometric module to absolute pressure mode (optional)
				Certificate
		F		Traceable Certificate to International Standards
		H		Accredited Certificate - ISO17025 (optional)
				Accessories (Optional)
			A	External Power Supply
			B	Power Supply /Charger plus 6 x Ni-MH rechargeable AA
			C	Large padded soft case with shoulder strap
			T	Temperature Sensor: Pt100 Probe incl. traceable certificate
			T2	Temperature Sensor: Pt100 Probe, -40 to 150 °C incl. accredited certificate – ISO17025
			T3	Temperature Sensor: STS050 Probe, -40 to 400 °C incl. accredited certificate – ISO17025
ASC-400	BARO	FC		ASC-400 with barometric module, traceable certificate and soft case
